A Covenant with God Part 10

September 5-6, 2009

REISH

20th Letter of Ancient Hebrew Alphabet

Reish is associated with a higher consciousness stating we are all capable of great intuition. Only fear and anger are the obstacles to this greater consciousness. God created man able to naturally teach himself, understand, and reason with his natural intellect. However, there is a higher way where logic is not able to reach such as things of the future events and hidden universal secrets. This all relates to breath or wind and God breathed the breath of life into man, and he became a living soul.

The wind and breath relates to the Holy Spirit Who will lead us into all truth...not speak on His own but reveal all of the Jesus or (Word) Truth.

Early Hebrews used breathing as a gateway to a higher consciousness. Altered breathing patterns, combined with physical position and guided meditation on the Hebrew alphabet (divine communication), can bring about limited levels of higher learning in the natural, but the fullness of the Holy Spirit can take one to higher levels of spiritual consciousness, giving strong influence into what to do for tomorrow and foreseen dangers and discernment.
